## Company Overview

As Commercial Lighting Products is aware of the need for efficient processes and instant gratification, we have evolved into a one-stop supplier of name brand, quality lighting products.

Throughout our 23 years in business, we have continued to concentrate on property management and replacement lighting, while expanding our services to include performing lighting audits for “Power Smart” retrofits in residential, commercial, institutional, and industrial construction. Additionally, we provide consultations for decorative and landscape lighting designs. As we are a stocking distributor of many major fixture lines, including Lthonia, Prescolite, Hubbell Lighting, Beghelli and Contrast, we can quickly and effectively get you the products you need on time and on budget.

## What We Do

Our *five* full-service distribution centres, located in Victoria, Vancouver, Calgary, Edmonton, and Winnipeg, allow us to handle both your day-to-day needs and any special projects you may have in a prompt manner. Our branches and our suppliers work together to keep consummate levels of stock that many electrical distributors draw from. Our 27 outside sales representatives, covering British Columbia to Manitoba, participate in ongoing education programs to ensure their knowledge of lighting systems is complete and up to date.

## Customer Service

As a master distributor for **General Electric**, **Philips**, **Universal Lighting Technologies** (formerly Magnetek), and **Advance Transformer**, we work closely with the different support systems to achieve unsurpassed technical support. Along with the use of energy auditing software, like ValueLight (GE) and Audit 2000 (Philips), we are able to show end users how changes to their lighting systems can benefit both visually, by creating ambiance & enhancing the appearance of their products, and, financially, by illustrating payback & return on investment.

With a proven formula for success and enthusiastic staff in every department, Commercial Lighting Products will continue to distance itself from the competition. We look forward to being your **"No charge, on-staff lighting consultants"**!
